5. FIRE FIGHTING MEASURES

Extinguishing Media

Property	Specification / Information
Suitable Extinguishing Media	Use dry chemical, CO?, water spray (fog) or foam. Sand.
Unsuitable Extinguishing Media	Do not use a solid water stream as it may scatter and spread fire.

Specific Hazards Arising from the Chemical

Property	Specification / Information
Specific Hazards	Combustible liquid. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion.
Hazardous Thermal Decomposition Products	Decomposition products may include carbon dioxide, carbon monoxide, various hydrocarbons, aldehydes and soot.

Special Protective Actions and Equipment

Property	Specification / Information
Special Protective Actions for Fire-Fighters	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from the fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
Special Protective Equipment for Fire-Fighters	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
Remark	Not considered explosive based on chemical structure and oxygen balance considerations.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedure	Wear protective clothing as described in Section 8 of this safety data sheet
Enviromental Precaution	Avoid discharge to the aquatic environment.
Methods and materials for containment and cleaning up	Stop leak if possible without risk. Absorb in vermiculite, dry sand or earth and place into containers. Flush with plenty of water to clean spillage area. Containers with collected spillage must be properly labelled with correct contents and hazard symbol.
Reference to other sections	Wear protective clothing as described in Section 8 of this safety data sheet. See section 11 for additional information on health hazards. For waste disposal, see section 13.

7. HANDLING AND STORAGE

Precautions for safe handling	Read and follow manufacturer's recommendations. Avoid spilling, skin and eye contact. Wash hands after handling.
Conditions for safe storage, including any incompatibilities	Store in tightly closed original container in a dry, cool and well-ventilated place

The generation of waste should be avoided or minimized wherever possible.
Disposal of this product, solutions and any by-products should at all times comply
with the requirements of environmental protection and waste disposal legislation and
any regional local authority requirements. Dispose of surplus and non-recyclable
products via a licensed waste disposal contractor. Waste should not be disposed of
untreated to the sewer unless fully compliant with the requirements of all authorities
with jurisdiction. Waste packaging should be recycled. Incineration or landfill
should only be considered when recycling is not feasible. This material and its
container must be disposed of in a safe way. Care should be taken when handling
emptied containers that have not been cleaned or rinsed out. Empty containers or
liners may retain some product residues. Vapor from product residues may create a
highly flammable or explosive atmosphere inside the container. Do not cut, weld or
grind used containers unless they have been cleaned thoroughly internally. Avoid
dispersal of spilled material and runoff and contact with soil, waterways, drains and

sewers.
